3
QUESTION

Are there any special restrictions that may affect work to your property?

The Building is Listed

There will almost certainly be restrictions on what is permissible and you will need to check with your borough or district council.

It's in a
Conservation Area
that is subject to an
Artical 4 directive

There will almost certainly be restrictions on what is permissible and you will need to check with your borough or district council.

It's in a
Conservation Area
but not subject to
an Artical 4 directive

The status of such areas varies, but it is normally possible to replace like for like in appearance as long as there is no alteration to the size and shape.

I rent the property

Replacement of windows and sashes would require consent from the landlord.

Not Sure

It would be wise to check the status of your building as undertaking certain works without permission could constitute a criminal offence.

No

QUESTION

What do you want to try and achieve?

Improvement:
Stop rattles /
draughts and make
the windows work
better

Consider window improvement services.

See draught seal and overhaul or restoration services.

Typically 15-25% cost of replacement and would not require consent

Improvement:
Reduce Heat Loss /
draughts and make
the windows work
better

This requires a themal break and can be achieved in a number of ways;

- 1.Draught seal existing window and use secondary glazing or timber shutter.
- 2.Draught seal and introduce new double glazed sashes*.
- 3.Complete replacement*

Improvement: Reduce levels of outside noise

This requires a dead air space and can be achieved in a number of ways.

- 1.Draught seal existing window and use secondary glazing or timber shutter.
- 2.Draught seal and introduce new double glazed sashes requires special glass*.
- 3. Complete replacement- requires special glass*

Improvement:
Keep the original frame and replace the sashes or door leaves

If existing frames are in good condition, it is usually possible to introduce new single or double glazed sashes which can then be draught sealed.* Deemed to be improvement rather than replacement.

Typically less than 60% cost of complete replacement

Improvement:
For new build /
extensions and
complete
replacement
(typical or custom
profiles available)

Our custom made, bespoke joinery can be created to a near infinite variety of sizes, profiles and configurations but will require adherence to thermal performance qualities (if no conservation dispensation)*. Installation from a FENSA registered contractor or certification from building control
